I personally think to make this game more enjoyable would be as easy as adding music or ambient sounds adding some more colour and the ability to save. <https://youtu.be/A0QBalt8WMo> The quality writing captures the choice based adventure style with enough hooks and experimentation to hold onto the player's attention.. It just plain wasn't good. It was slow, it was boring, you're better off playing Dragon's Lair. It's literally just a slower, reading-based Dragon's Lair.
